

Port Access Road Traffic Management Plans

Effective 11th July 2014

The completed Sorrell's Roundabout scheme will now be in operation including the newly installed traffic signals. The new signalised Corringham Road crossing will be in operation from 21st July. In the meantime minimal traffic management on each approach to the roundabout will still be required to allow for the construction of the remaining landscaping works, with our anticipated completion for this element of work being late September. On completion all the traffic management will be removed.

Traffic Management Update
